PLAN YOUR FINANCES

Tuition
USask uses tuition to provide high-value academic programming and services and to fund program enhancements, student supports, and financial aid.

For most programs you can enter directly from high school, tuition is calculated by adding up the cost of individual classes you enrol in. Many programs offer flexibility, allowing you to choose classes based on your interests, schedule and budget.

The following estimates reflect a typical amount you could expect to pay if you enrol in a full course load (the maximum number of courses allowed) in the fall and winter terms (Sept-Apr).

<table>
<thead>
<tr>

</table>

These estimates are based on 2023-2024 tuition rates for a typical student course offering within each program. International undergraduate tuition rates are assessed at 4.2 times the rate for Canadian citizens and permanent residents.

Student fees
Student fees fund benefits and services that contribute to an excellent student experience at USask, including:

- U-PASS student transportation pass, health and dental insurance, and services and infrastructure provided by your student union
- Huskies games tickets
- Access to USask athletic facilities and recreation programs
- Wellness and accessibility services

ADMISSION REQUIREMENTS

You can apply directly from high school to degree programs offered in the Colleges of Agriculture and Bioresources, Arts and Science, Education, Engineering, Kinesiology and Edwards School of Business.

To be considered for admission, you will need to:

1. Apply for admission before the deadline for your program.
2. Complete specific required Grade 12 classes.
3. Meet the required admission average.
4. Provide proof of English proficiency (if required).

How we calculate your admission average

**High school students**

After you apply for admission and provide all the necessary documents, we calculate your admission average using the subjects and grades that appear on your high school transcript using this five-mark formula:

- One English
- One math
- Three other approved subjects:
  - Maximum of two natural sciences
  - Maximum of two social sciences or humanities
  - Maximum of one fine or performing art

**Transfer students**

If you have already attended college or university and have 18 credit units or more of transferable courses, your average will be calculated using the grades for your transferable university courses.

USask Transition Entrance Program and special admission

USask offers pathways to admission for students who do not meet regular admission requirements, including:

- University of Saskatchewan Transition Entrance Program (USTEP)
- Special (mature) admission
**Arts and Science**

Will you face the challenge to be what the world needs? With the largest number of areas of study at USask, the College of Arts and Science is truly the college of possibilities. By bridging the gap between the arts and the sciences, our students develop an interdisciplinary perspective on issues critical to our world. The diversity of our college community is our pride. We provide you with the freedom to create your path and the lifelong skills to succeed academically.

Engineering

Our RE-ENGINEERED first-year program will help you succeed in your degree and in your career as a professional engineer. All first-year students take a common set of shorter, more intensive classes that cover a broader range of material than traditional first-year programs. RE-ENGINEERED also includes after-school tutorials and organized study squads so you can get academic support when you need it. At the end of first year, you’ll apply to study one of our eight engineering discipline programs—all are accredited by the Canadian Engineering Accreditation Board.
