

UNIVERSITY OF SASKATCHEWAN

College of Agriculture
and Bioresources

AGBIO.USASK.CA

BACHELOR OF SCIENCE **AGRIBUSINESS**

Agribusiness impacts every stage in the food chain, from primary production to the packaging of your favourite snack food. It is also a dynamic field that must respond to sweeping advances in technology, to major changes in trade and policy, and to an ever-changing, consumer-driven marketplace.

The Bachelor of Science in Agribusiness combines science, economics, agricultural economics and business courses. Students learn about business management, marketing, finance and sales, as well as the legal and institutional environments that characterize agribusiness.

Graduates will understand the structure and organization of the agri-food sector and possess business skills relevant to farm input, on-farm businesses, processing, transportation, credit and marketing.
